AREEHA ZULFIQAR CHAUDHARY

AI & Full-Stack Engineer · LLM Applications · RAG · Agents

Lahore, Pakistan · zulfiqarareeha06@gmail.com · +92 322 3406039 · github.com/Areeha2004 · linkedin.com/in/areehazulfiqar

TECHNICAL SKILLS

Languages: TypeScript · JavaScript · Python · C# · C++

AI Engineering: LLM Applications (OpenAI API) · RAG · AI Agents (LangGraph) · Embeddings & Vector DBs (Chroma) · LLM-as-Judge & Evals · Structured Outputs · Prompt Engineering · LangChain · Computer Vision (MediaPipe)

Frontend & Backend: Next.js · React · Node.js · Express · FastAPI · ASP.NET Core · Tailwind CSS

Data & Tools: PostgreSQL · Supabase · Prisma ORM · SQL Server · Git · Firebase · Stripe · Vercel

Concepts: Full-Stack System Design · REST APIs · JWT / Auth · Agile / Scrum · MVC · CI/CD

EXPERIENCE

Junior Software Engineer (Part-Time) · NewGates Systems *Jan 2026 – Present*

- Build and maintain production full-stack web apps (Next.js, React, TypeScript) for offshore clients; delivered complete business workflows integrating Stripe payments, Firebase auth, and Odoo ERP.
- Primary frontend contributor on 2+ active client projects in an agile team; own end-to-end feature delivery via Git feature branches.
- Work directly with offshore stakeholders to translate requirements into production-ready features across time zones.

PROJECTS

Roamio — AI Trip Planner for Northern Pakistan - *Next.js · FastAPI · LangGraph · Chroma · OpenAI · Tavily*

- Built a RAG + agent system that turns a few constraints into a grounded, day-by-day itinerary — a LangGraph state machine (search → plan → re-plan loop → live conditions → write) where deterministic Python owns every trusted decision (route, cost, feasibility) and the LLM only writes prose.
- Engineered two retrieval pipelines (semantic destination search + a grounding corpus from Wikivoyage / Wikipedia / Tavily) so day notes cite real sources, plus an LLM-as-judge faithfulness guard that fact-checks each note and softens unsupported claims.
- Added natural-language trip editing (free text → typed edit operations via structured outputs) and a lean evals harness (deterministic assertions + faithfulness scoring); documented the architecture as ADR-style decision logs. Live

SmartMeet — AI Meeting Analytics Platform (Final Year Project) - *React · FastAPI · MediaPipe · Python · Computer Vision*

- Engineered a real-time meeting analytics system that uses computer vision to detect gaze direction, engagement levels, and interaction patterns across ~10 concurrent video sessions.Live
- Designed a modular ML pipeline with MediaPipe-based models and a scalable React + FastAPI architecture with clean separation between the inference and API layers.

Uraan — AI Women Entrepreneurship Platform - *Next.js · Node.js · PostgreSQL · Prisma · OpenAI API · NextAuth.js*

- Full-stack AI platform helping Pakistani women launch businesses (quiz-based profiling, AI-generated roadmaps, community support); integrated the OpenAI API with structured prompt engineering over JWT auth and a normalized PostgreSQL schema with 5+ entity relationships.Live

Volt — Smart Energy Management App *(Next.js · Supabase · Prisma · OpenAI):* household energy tracking with per-device usage breakdowns, bill forecasting, and GPT-powered savings tips; row-level security for multi-user data isolation.Live

EDUCATION

BS Software Engineering — PUCIT, Lahore *2022 – 2026*

- Teaching Assistant, Artificial Intelligence — supported 30+ students in AI concepts, algorithms, and assignments under faculty supervision.
- Built 4 full-stack + AI projects end-to-end; competed in national coding competitions and AI hackathons.
